Steamship Trust \$170,000,000 Grand total\$5,210,993,386 A local newspaper says: "It has been made plain that J. Pierpont Morgan's real intention is to girdle the globe and capture the carrying trade of the world. All he jured brought here. needs is the Russian Transsiberian road, which American engineers are building. Mr. Morgan is now planning to build railways in China. He has asked China for a permit. A week before last he secured the transatlantic steamers. Last week he was after the South American ships and railways.

-Ships.-

What next he will do no man knows. "Mr. Morgan and six other American citizens have now become more powerful than any congress or parliament in the world. Fourteen steamship lines and forty-four railroads are theirs. On land a mileage of 108,500 and on sea a tonnage of 1,200,000 are in their control. Three hundred of the largest steamships in the world and 30,000 of the best equipped passenger and freight trains take orders from them. This railway mileage is greater than the combined mileage of Great Britain, Russia, Germany, Spain, Holland and Belgium. And more than 300 vessels, which will sail under its cut. orders, cannot be duplicated from the merchant marine of every ocean.

A world-wide transportation trust has long been Mr. Morgan's dream. English newspapers are making comically pitiful pleas to Morgan to let England come into the new trust, not as an annex to America but 38 an equal partner. The fact that Mr. Morgan is addressed in tones of supplication shows that he is absolute master. Not Alexander, in all his glory; not Cesar Augustus, not even Napoleon, with all his mighty armies, was such a conqueror as P. Morgan with his little 'yes' and 'no' that makes or unmakes trusts.

No king is one-tenth so powerful as Morgan. Edward VII, Emperor William, Nicholas of Russia-any one of these is a pigmy in real power compared with Mor- face badly cut. gan. By nationality an American, he is in fact a citizen of all countries. Almost every kind of man who labors works for Morgan through some of his companies. Rudyard Kipling, Lew Wallace-all the geniuses who in the fine frenzy dash off poetry and write stories for Harper's, are working for Morgan. The patient scientists are digging out minute facts for Morgan to scatter to the world. The artist with pencil and brush draws and paints,

and Morgan pays them. "So absolute has he become that while he is personally worth perhaps not more than a hundred million of dollars, corporations over which he has control possess more wealth than there is gold on the earth. The total capitalization of all the companies he controls is \$5,210,993,386-and all the gold coined and uncoined, in all the nations, including the populous East, is estimated at \$4 \$4: 000,000. There are in the whole known world about 1,320,000,000 human beings. J. P. Morgan controls enough to give each \$4. More than a million men are employed by the companies Mr. Morgan controls. This means that five million men, women and children are dependent on him for a livingor rather that five million persons contrib-

ute to his comfort.' Morgan's Agreement with Germans. HAMBURG, April 27 .- An official statement of the terms of the agreement between the German steamship lines and the syndicate formed by J. P. Morgan is published here. The agreement between the Hamburg-American Packet Company and Mr. Morgan, it appears, was concluded last March. Under the agreement, it is claimed. the German lines have preserved their independence in every respect. The syndicate is bound not to send a ship to any German harbor without permission of the German lines, which in turn bind themselves not to increase their present traffic from England to the United States beyond a certain fixed point. Many other clauses in the agreement aim at preventing competition between the syndicate and the German lines. Neither may acquire shares in another, but they are to mutually support

"The Germans," says the Daily Mail, "have made a good bargain, because the German government was wideawake, whilst the British government ignored warnings and laughed at threatened peril. "It is high time," the article concludes, "that both the nation and the government awoke to their peril."

DOMESTIC TRADE MOVEMENTS. Live Stock Receipts and Shipments

Continue to Show an Increase.

Special to the Indianapolis Journal. WASHINGTON, April 27.—Domestic trade movements for the first quarter of 1902, compared with those for the corresponding period in 1901, are reported in the March summary of internal commerce by the trea. ry Bureau of Statistics. These figures seem to indicate a continued increase in the volume of representative branches of commerce. The receipts of wheat at eight markets in the interior for the year 1901 up to April 1 amounted to 181,783,965 bushels, compared with 196,632,766 bushels for the corresponding period of 1902. There is thus a gain of 8.1 per cent, to the credit of the current quarter.

The live-stock movements exhibit the same general tendency, with sor tions. For the first quarter of 1900 the receipts of five kinds of stock at the five leading markets of the interior were 7,412,703 (CONTINUED ON PAGE 5, COL. 5.)

MUNCIE, Ind., April 27 .- In self-defense this evening Harry Kern, twenty-one years old, shot James L. Tartar, aged twenty-six, and the latter is dying at the hospital with bullet through the right lung. The men were at the Oland saloon, in the suburb of Whitely, quarreling, when Tartar said: "I am from Kentucky," drew a revolver a furrow along Kern's right side just under the skin. Kern then pulled his revolver, a .32-calibre, and fired two shots at close range. The second shot took effect. Tartar resides at Jamestown, Ky., and has been visiting relatives at Royerton, five miles north of Muncie. His young wife has been sent for. Tartar does not want his assailant prosecuted, confessing that he "started something and lost out," but declares that he is too game to die. It is said by some of the spectators that eight shots were exchanged. Kerns was placed in jail, bond being refused, but the officers
